

Gordon Fischer

12370 Alameda Trace Circle Apt 332
Austin, TX 78727

816-812-3968
fischer@sarken.org

Qualifications

- 10+ years experience in information technology
- 4+ years experience in leadership roles
- Product design, management and implementation
- Event-driven and object-oriented methodology
- Artificial intelligence design techniques
- Distributed programming and cluster management
- Embedded and real-time system development
- Relational database architecture

Publications

- Co-author of *The Linux Kernel Primer*
- Inventor or co-inventor on nine pending patents

Technology

- C, Lisp, C++, Java, Prolog
 - Ruby on Rails, Perl, PHP, AJAX, Javascript
 - Linux, OpenBSD, FreeBSD, Mac OS X
-

Employment History

Director of Technical Development

Sep 2004 - Sep 2006

Kozoru - Overland Park, Kansas

- Successfully created and released a customizable chat-based search technology
- Designed numerous protocols to interface with external search APIs and chat networks
- Constructed and implemented natural language, statistical and hybrid parsers for extraction of key sentences
- Developed distributed cluster management techniques for hundreds of nodes
- Architected and deployed a template extraction for wikipedia chat buddy - similar to wikiseek.com
- Managed a team of seven software engineers

Technical Team Lead

Mar 2004 - Aug 2004

21st Century Technologies - Austin, Texas

- Led research and development for homeland security threat assessment tool
- Focused on semantic reasoning, graph matching and social network analysis

Embedded Software Developer

Aug 2000 - Sep 2003

Advent Networks - Austin, Texas

- Developed multi-threaded initialization and software update programs for router firmware
- Assembled and modified embedded operating systems for deployment on custom cable modems and switch routers
- Created and modified Linux device drivers for a variety of hardware and software devices
- Constructed communication and control programs and protocols across both internal and external interfaces of switch routers and modems
- Maintained and continued product development of three lifecycles of hardware
- Project lead of four software engineers

Server Developer

Mar 2000 - Aug 2000

Netpliance - Austin, Texas

- Designed and implemented a distributed server architecture to control data flow between hundreds of thousands of remote clients

Artificial Intelligence Developer

Sep 1998 - Feb 2000

Cycorp - Austin, Texas

- Created a semantic web search engine using information from the CYC knowledge base
- Formulated and programmed methods of communication and computation for distributed knowledge bases
- Developed core CYC technology for use in ontological searching, inferencing and caching
- Participated in constructing an ontology used in augmenting answers for DARPA crisis scenarios

Real-Time Speech Algorithm Developer

Jan 1998- Apr 1998

Northern Telecom - Montreal, Quebec

- Enhanced rejection and token handling of speech recognition software
- Optimized speech recognition algorithms and co-developed a test tool for firmware based continuous speech recognition

Programmer / Analyst

Allied Domecq - Windsor, Ontario

May 1997 - Aug 1997

May 1994 - Aug 1994, Jan 1995 - Apr 1995

- Established object oriented class libraries for use by developers world wide
- Co-developed Windows based sales force automation program for North American deployment
- Constructed automated procedures for conversion, replication and integration of mission critical data
- Led standards development in object oriented programming and system analysis

Systems Programmer

IBI Group - Toronto, Ontario

May 1996 - Aug 1996

- Participated in developing classes and debugging the real-time program for the Toronto Pearson Airport computerized taxi deployment system
- Developed internal accounts receivable application for international use
- Planned, constructed, tested and assisted in deploying the accounts receivable application

Education

- **University of Waterloo**
Honors Bachelor of Mathematics - Computer Science with Cognitive Science Option
